POLLUTANT AND ASBESTOS ABATEMENT- BEAR RESPONSIBILITY

The renovation of buildings and objects requires special responsibility. Substances harmful to health and environment, such as asbestos, often come to light during renovations. Therefore pollutant remediation should be handed over to experienced companies who are aware of this responsibility.

The Rohrer Group works closely with specialist consultants and laboratories to obtain an in-depth analysis of health endangering materials. These independent evaluations are the best basis for the comprehensive planning of the pollutant remediation.

SYNERGY EFFECTS

As a multi service provider, the Rohrer Group bundles the areas of insulation and scaffolding in the field of pollutant remediation.

Activities such as building of the required scaffolding, disassembly the insulation, proper remediation of pollutants, proper disposal up to the reassembly of insulation material you get from a single source by Rohrer Group.
